This is in response to Applicants' Election filed February 19, 2004.

Applicant's election without traverse of the invention Group I, claims 1-7, 26 and 27 filed February 19, 2004 is acknowledged.

After further review of all of the claims, examiner reveals that all of the claims should be examined at once because all of the claims are closely related. Thus, the previous Restriction requirement, dated January 13, 2004, is hereby rescinded and claims 1-27 will be examined. Examiner regrets any inconvenience which would have occurred.

The following is an examiner's statement of reasons for allowance: The prior art fails to teach an apparatus for scanning a beam across a surface, among other features, comprising a scanner for scanning a pulsed laser beam across the surface; and a position indicator for receiving the pulsed laser beam at a plurality of locations from the surface, and outputting position indications indicating a position of the beam along the surface. The prior art also fails to teach a system for recording a pattern on a substrate, among other features, comprising a modulator receiving a pulsed laser beam for producing a modulated pulsed beam in response to a pixel defining signal; and a scanner scanning the modulated pulsed beam across the surface of the substrate to record a pattern defined by pixels on the surface, wherein a rise time of the pixel defining signal is less than a pixel period of the pixels.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

I) Hamada 4,940,310 discloses an optical scanning system having a plurality of laser beams and a modulation starting detection for the beam.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Que T. Le whose telephone number is (571) 272-2438.
